Rosebud Paddle

Description

The Rosebud Paddle is a durable mixing tool designed for use with the NATCEM® range of fast-setting cementitious materials. Its shape promotes consistent, lump-free mixing and improved material workability. The paddle is compatible with standard power drills and is suitable for use in applications such as rendering, grouting, void filling, and concrete repair.

Properties

- Compatible with standard power drills
- Promotes even, lump-free mixing
- Suitable for fast-setting cementitious materials
- Reusable and easy to clean after use

Mixing

The Rosebud Paddle is designed for use with a power drill to ensure consistent and efficient mixing of Natural Cement products.

For best results, add the powder to water as directed, then mix using the Rosebud Paddle until a uniform, lump-free consistency is achieved.

The paddle is suitable for use with a variety of container sizes and is effective in mixing both small and medium batch quantities.

See relevant product data sheet for full mxiing instructions of each Natural Cement Product. These are available to download at **www.naturalcement.co.uk**.

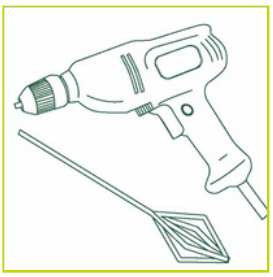
Precautions

We strongly recommend the use of GLOVES, GOGGLES and MASKS. Full details are given on the Material Safety Data Sheet also available at **www.naturalcement.co.uk**.

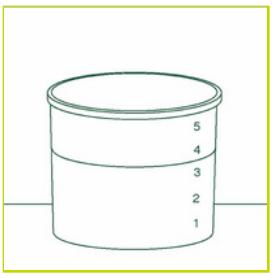
Application

The Rosebud Paddle is suitable for use with the following Natural Cement products:

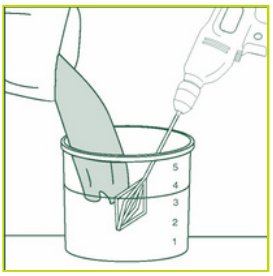
- NATCEM® 35
- NATCEM® AC
- NATCEM® DW
- TRACKCRETE
- NATCEM® D GROUT
- CWG GROUT



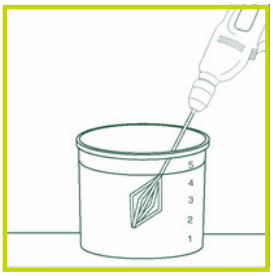
Rose bud paddle in electric drill 900rpm 1000w.



Place appropriate amount of water into a container.



Add the NATCEM material to water, mixing all the time.



After the NATCEM has been added, mix for at least 2 minutes.
